PROJECTS

A weather forecast application that provides information on the
weather conditions of various areas using Rapid Api.

Built a login/register form with forgot password feature that
sends a reset password message to your Email using Firebase for
data storage and authentication.

Built a simple todo app

Built a movie discovery web application that allows users to
search for movies, view details about them, and save their
favorite movies using data from the TMDB API.

Collaborated with the team to build Preggify's website.

Built my Personal Portfolio Website using Nextjs, Tailwind CSS
and Framer Motion.

Built a website for the annual Tech Starters Conference
hackathon and CTF.
